# Evolutionary Electronics: Automatic Design Of Electronic Circuits And Systems By Genetic Algorithms (International Series On Computational Intelligence)

## Synopsis

From the explosion of interest, research, and applications of evolutionary computation a new field emerges-evolutionary electronics. Focused on applying evolutionary computation concepts and techniques to the domain of electronics, many researchers now see it as holding the greatest potential for overcoming the drawbacks of conventional design techniques. Evolutionary Electronics: Automatic Design of Electronic Circuits and Systems by Genetic Algorithms formally introduces and defines this area of research, presents its main challenges in electronic design, and explores emerging technologies. It describes the evolutionary computation paradigm and its primary algorithms, and explores topics of current interest, such as multi-objective optimization. The authors examine numerous evolutionary electronics applications, draw conclusions about those applications, and sketch the future of evolutionary computation and its applications in electronics. In coming years, the appearance of more and more advanced technologies will increase the complexity of optimization and synthesis problems, and evolutionary electronics will almost certainly become a key to solving those problems. Evolutionary Electronics is your key to discovering and unlocking the potential of this promising new field.

## Book Information

Series: International Series on Computational Intelligence (Book 22)

Hardcover: 304 pages

Publisher: CRC Press; 1 edition (December 20, 2001)

Language: English

ISBN-10: 0849308658

ISBN-13: 978-0849308659

Product Dimensions: 1 x 6.5 x 9.2 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #3,983,664 in Books (See Top 100 in Books) #70 in Books > Computers & Technology > Programming > Algorithms > Genetic #1293 in Books > Engineering & Transportation > Engineering > Electrical & Electronics > Circuits > Design #1465 in Books > Education & Teaching > Schools & Teaching > Counseling > Career Development
