# The Cannabis Encyclopedia: The Definitive Guide To Cultivation & Consumption Of Medical Marijuana

## Synopsis

The award winning Cannabis Encyclopedia is the definitive guide to medical marijuana cultivation and consumption. It explains all the essential techniques to grow indoors, outdoors and in greenhouses. All gardening practices are well-researched and illustrated with easy step-by-step examples and instructions. More than 2,000 beautiful color images illustrate this 596-page book. The large 8.5 x 11-inch format, three-column pages are easy to read and packed with up-to-date information that make this book essential for all cannabis gardeners and patients. Chapters on medical cannabis history, cannabinoid measurement and medical varieties provide a firm background for medical patients and caregivers. The Medicinal Concentrates and Cooking with Medicinal Cannabis chapters feature many different methods to concentrate and consume cannabis. Each stage of plant growth is detailed and graphically explained seed, seedling, vegetative growth, clones and mother plants and flowering. Harvest, drying and curing information aims to preserve cannabinoids. Garden room design, construction and maintenance, greenhouse construction and care, outdoor gardens from backyards and patios to large remote fields are all explained in full detail and many step-by-step examples. Four case studies feature two indoor gardens, one with LED and HP sodium lamps, Jorge's backyard garden and a big garden in Humboldt County, CA. Each aspect of cannabis cultivation is examined in detail with a focus on organic practices preserving the sanctuary, meters, air, light, lamps and electricity, soil, containers, water, nutrients, additives, container culture and hydroponics, diseases and pests and breeding. The comprehensive Nutrient chapter has individual drawings of 14 cannabis plants showing nutrient excess and deficiencies. The Breeding chapter explains methods, plant crosses, back crosses, true breeds, hybrids, etc. and provides step-by-step illustrated instructions on starting your own home breeding program. Learn exactly how to increase yields, increase cannabinoid potency, and make eco-friendly decisions from the expert, Jorge Cervantes. His advice is basic, detailed and reliable.

## Book Information

Paperback: 596 pages

Publisher: Van Patten Publishing; 1 edition (April 20, 2015)

Language: English

ISBN-10: 1878823345

ISBN-13: 978-1878823342

Product Dimensions: 8.5 x 1 x 10.9 inches

Shipping Weight: 3.6 pounds (View shipping rates and policies)

Average Customer Review: 4.9 out of 5 stars [See all reviews](#) (313 customer reviews)

Best Sellers Rank: #4,791 in Books (See Top 100 in Books) #5 in [Books > Science & Math > Agricultural Sciences > Crop Science](#) #7 in [Books > Reference > Encyclopedias & Subject Guides > Gardening](#) #8 in [Books > Crafts, Hobbies & Home > Gardening & Landscape Design > Reference](#)

## Customer Reviews

This is likely the most complete and detailed reference available on the subject of Cannabis production, covering everything from the basics of gardening to the construction of large growing facilities, plant diseases and problems, breeding and genetics, pest control -- you name it, it's covered here, and in amazing detail, profusely illustrated with beautiful photos and informative graphics. Interestingly, the foreword is written by Vicente Fox, former President of Mexico, whose country and people have suffered the worst of the so-called War on Drugs, and whose insights are especially poignant. Beyond that, there is a brief discussion of the history of medical cannabis, and not a great deal on the subject of legalization. That's for the better, as the situation regarding both medical and recreational cannabis is changing so rapidly. It should be noted that while the main focus of the book is on medical Cannabis, the information is equally valid and useful for those who live where either personal or professional Cannabis production is legal. Beginning with a general overview of the growing process, there are detailed chapters on everything from seed selection and germination, indoor and outdoor gardening, hydroponics, lighting, life cycle and flowering, harvesting, and post-harvest processing and preservation, and troubleshooting the various problems that come up. The information is not just there, but it is well organized and presented, so you can look up and find what you need.
