Customer Reviews

This book with only 10 recipes, was great for a fp beginner like me. I didn't want anything gourmet and difficult to follow. This was just what I needed to start using my new kitchen tool. Oh and of course I couldn't beat the .99 price.

Use one of the ten frequently. Just don't find a food processor that beneficial. A good blender is a better investment and one you will frequently. A Ninja is the one I use and I have had several different brands

I was disappointed that so many of the recipes called for ingredients that I seldom have on hand

(which will require special trips to store for me). The recipes look like they will taste good but I have a monthly grocery budget and try to limit extra trips to the store whenever possible so I probably won't refer to this cookbook often.

It wasn't anything I could use because I have an older food processor. The recipes did not work with mine at all
